

Follow 3 simple steps when accepting Visa Travelers Cheques and help protect your business.

STEP 1 Examine

Look at the cheque and examine the security features:

Paper – does it feel like currency?

Watermark – is this visible on the front side of the cheque only when the cheque is lifted to the light?

Raised texture – does the blue border of the cheque feel raised?

Holographic thread – does the vertical silver, metallic strip with the word 'secure' shine and change colour when the cheque is moved?

STEP 2 Watch

Ensure the presenter countersigns each cheque in the lower left signature space.

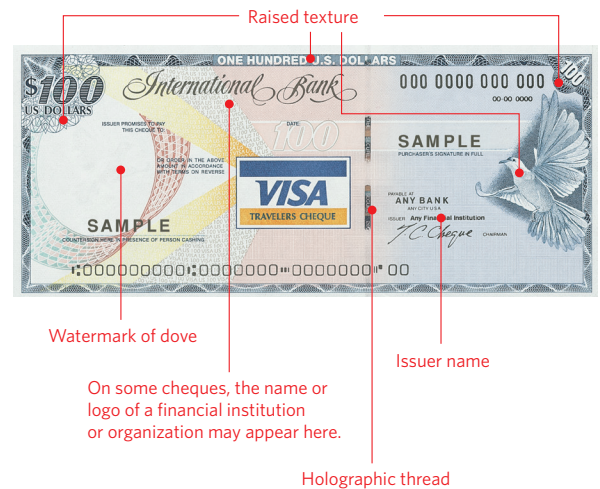

STEP 3 Compare

Compare the countersignature with the original signature in the upper right. If the signatures do not match, or the cheque is already countersigned, ask the presenter to countersign the cheque again on the reverse side. As a prudent measure, please ask the customer to show photo identification and take a photocopy or record the details on one of the cheques.

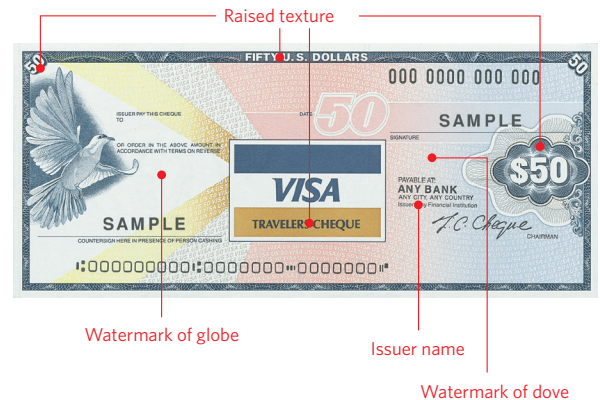

For dual signature travelers cheques the countersignature must match one of the two original signatures in the upper right.

Ensure the amount presented is consistent with your normal business transactions.
